PROFESSIONAL SUMMARY

3rd-year B.Tech Computer Science (AI & ML) student with strong Python, MATLAB, LaTeX, Object-Oriented Programming, Git and CI/CD skills. Strong problem-solving skills, with experience in code validation, debugging, edge-case testing and building data-analysis dashboards with Python. Seeking a Software Development and Testing internship to build automated validation and reporting tools for engineering teams.

EDUCATION

Parul Institute of Engineering & Technology Jul 2024 – Apr 2028 (Expected)
B.Tech in Computer Science Engineering (AI & ML) – currently in 3rd year
Maharashtra State Board – 12th Standard (HSC) Apr 2024

TECHNICAL SKILLS

Programming: Python, MATLAB, Java, JavaScript, TypeScript, SQL, Bash
Documentation & Reporting: LaTeX, Technical Documentation, Automated Reporting, Data Analysis Reports
Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Networks
Testing & Validation: Software Testing, Tool Validation, Code Review, Code Validation, Debugging, Edge-Case Analysis, Postman (API testing)
Version Control & CI/CD: Git, GitHub, GitLab, Jenkins, GitLab CI, Artifactory, Continuous Integration / Continuous Deployment (CI/CD), Jira (Agile), Docker, Linux
Data & ML: Data Analysis, Scikit-learn, K-Means, Random Forest, Chart.js dashboards, OpenAI API, LangChain, LangGraph
Web & Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, React.js, Next.js, Tailwind CSS
Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis, AWS
Professional Skills: Problem-Solving, Collaboration, Written & Spoken Communication, Proactive Learning

PROJECTS

Crime Hotspot Mapping – Predictive Analytics Platform | GitHub | Demo
Python, Flask, Scikit-learn, React.js, TypeScript, Supabase, OpenLayers
- Developed an AI-powered GIS platform for crime hotspot detection, risk prediction, real-time alerts and patrol route optimization across multiple locations.
- Implemented K-Means clustering and Random Forest prediction in Python with interactive spatial dashboards, supporting 1,000+ authorized users and 99.8% uptime.

Intelli-Credit – AI Credit Decisioning Engine | GitHub | Demo
Python, AI/ML, React.js, TypeScript, Tailwind CSS, Chart.js
- Built an AI-powered credit decisioning platform for financial analysis, borrower risk evaluation and data-driven decision support.
- Developed ML-based scoring and analytics dashboards, reducing assessment time from 30 minutes to 5 minutes per applicant with 94% prediction accuracy.

CryptoTrack – Blockchain Forensic Intelligence Platform | GitHub | Demo
Node.js, Express.js, PostgreSQL, Supabase, OpenAI API, Docker, React.js, TypeScript
- Built a forensic analysis platform for wallet tracking, transaction tracing, risk scoring and fund-flow analysis, with REST APIs (Express, Drizzle ORM, PostgreSQL) and Docker-based deployment, plus OpenAI-powered wallet audits.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer – AI Code Evaluation 2026 – Present
Alignerr (via Upwork), Remote | Upwork Profile
- Validate and rank AI-generated code for correctness, efficiency, readability, maintainability, security and software engineering best practices.
- Review solutions in Python, JavaScript, TypeScript, Java and C++; identify bugs, performance issues and edge cases and document findings as structured written feedback.

CERTIFICATIONS

- Hands-On DevOps and DevSecOps using Open Source Tools – Parul University (30 hours)
- AWS Certified Machine Learning Engineer – Associate (MLA-C02) – Sept 2026
- Prompt Engineering (Advanced) – LaunchED Global / Accelerex
- AI Adoption Strategy for Businesses – LinkedIn Learning

ACHIEVEMENTS & OPEN SOURCE

- Top 10 Finalist, KANAD S.H.I.E.L.D 2026 Hackathon – Cyber Crime Branch, Ahmedabad City Police i-Hub Gujarat
- Contributor, GSSoC 2026 (GirlScript Summer of Code) and OSCi 2026 (Open Source Connect India)
- Solved 120+ LeetCode problems and 200+ coding problems across competitive programming platforms
